Add an intelligent dimension to your service by using the DYMENSION platform.

The DYMENSION solution provides instant insight into multiple levels of understanding and decision making, so you can use your time to better collaborate and grow as a business.

Empowering any team to engage and assess their estates performance and operational management, interactively through the use of data, information, intelligence and collaboration.

The operating platform offers 4 core dimensions that can be integrated into your services as follows:

Capture | Flow | Intelligence | Share

DYMENSION is at the cutting edge of innovation and is continually being developed to support clients to the next level of secure service and business process management. Its modular design and high level of configurability means that whatever type of service you deliver, this software platform can be an integral part of its successful growth and delivery.

Please discuss licensing options with your DYMENSION Account Manager or contact us directly using the details provided below:

A Kings Secure Technologies Company

DYMENSION OneTouch – a mobile and highly flexible solution that is an integral part of the Kings Secure Technologies DYMENSION Platform, allowing you to easily and innovatively extend the use of the platform within your business.

OneTouch can be used by on-site and mobile staff, third party contractors and engineers within multiple sectors such as Security, Crime and Risk Prevention and Compliance and Service Management, Capture real time incidents, and complete many types of processes, gathering data and multi-media evidence at the touch of a button.

Effectively used to streamline and automate processes such as incident reporting, inspections, compliance audits, civil recovery, patrol management, health and safety and dispatch job management processes - improving efficiency due to the ease and quality of real-time reporting.

OneTouch is also a secure and robust multi-media notifications and alerts engine, that delivers real time intelligence sharing easily.

The latest version of DYMENSION OneTouch is now available for download in both the Apple App Store and Google Play Store

DYMENSION OneTouch can be used to enhance many processes such as:

Incident Management

Significantly improved reporting, allowing better and more informed risk decisions.

Health & Safety

Improved visibility of non compliance leading to the reduction of claims and enforcing a good work practice culture. Promotes the effective response to serious issues, potentially reducing any reputational impact.

Dispatch Management

Safety and staff reduction opportunities by saving the financial costs of key holding and out-of-hours operations.

Patrol Management

Improved location based reporting with less resources and better intelligence generation.

Civil Recovery

Opportunities for increased revenue generation and preventative impact.

Data Sharing and Collaboration

Allows intelligence to be shared quickly and securely to enhance operations and safety of staff.
